

Production tools:

Sublime-text 3,
ux-pin,
Bootstrap,
jQuery,
Parsley,
Gulp,
Adobe Suite.

Project Analysis:

I believe I keep to my time line well although fell behind at the end a little.
If I was to do the project again it would be less time consuming as some of the steep learning curves have been made now within this project.

I would improve the web app Argo X by adding to its UI, easing the flow of the user and making the transitions ease in and out.
